Fargo | Tops

Increased profitability
When you scale with Fargo TOPS as your TMS provider, your business can grow faster than your cost base.

Improved cost optimisation
Enjoy smarter planning, better backhauls, optimised storage and the true/actual benefits of full intermodal capabilities.

Improved cash flow & cost recovery
Our embedded invoice generator eliminates the lag between completing a job and billing it. And, now you can track and reduce costs, and bill everything due back to your customers.

Maximised assets
Enjoy perfect visibility of your assets; if you can see them, you can put them to work.

Happy customers
With fewer human errors – and greater real-time visibility – your customers can track and manage shipment dates, enjoy better forecasting and more dynamic control over their supply chain.

Happy employees
Less stress, less burnout, less staff-dependency and fewer repetitive tasks all make for a better working environment.

Intermodal ⟷ Unlocked

Dispatch
Connect subcontractors. Keep jobs visible.
Keep third-party drivers connected through a simple browser-based app.
Capture ePODs, asset defects, seal checks and GPS updates, with job status changes sent straight to operators. Ideal for subcontractors and spot-hire work.

Tops Remote
Keep operations moving, wherever you are.
Access live jobs and Traffic Sheets from your smartphone or tablet.
Track vehicles and ETAs, answer customer and driver queries, send collection and delivery notes, and share ePODs on the move.

Tops Portal
Share the information each partner needs.
Give customers, consignees, subcontractors and planning teams access to the live job information you choose to share.
Keep partners informed and working from the same information.

Tops Tracker
Make container tracking feel familiar.
Let customers track containers as easily as parcels. They can search using a container number or customer reference and postcode, or follow a secure link to see live progress, waypoints and seal details.
Fewer 'where's my container?' calls for your team.
